

Over **10 years** of experience
1300 wind turbines currently maintained onshore and offshore across Europe

We operate
 in sea, land and sky.
 We are Skyform Wind.

Fully trained. Fully accredited.

Specialising in Statutory Compliance

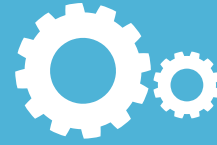

with full repair capabilities to international standards

Cranes

Lifts / Tower hoists

Pressure systems

Anchor point
Fall arrest systems
Emergency equipment

Work progress
reported online

Training for clients

Blade access and repair

Base grouting
Foundation / Water proofing

Cleaning / Painting
Coating

"Skyform have been providing the full scope of our Statutory Inspection services across two of our offshore windfarm sites. They have performed the inspections in a timely manner and to a high standard, providing us with comfort that provisions out in the field are safe and secure for continued use"

Tony Lyon, Head of O&M at Centrica

"We are currently using Skyform to perform "One stop shop" inspections, which has reduced our costs and finally improves turbine availability figures"

Mark Gregory, Site Manager at Statkraft

"Skyform has the unique offer of a "One stop shop" for all of our inspection requirements [...]. I would not hesitate in the recommending of Skyform as a Statutory Inspection total solution and as a strategic partner"

Steven King, QHSE Coordinator at Deutsche Windtechnik

Skyform Wind part of the Skyform Group
